1.2 Concept

A pressure ulcer is localized damage to the skin and/or underlying tissue, often over a bony prominence, as a result of pressure or pressure combined with friction.

A pressure ulcer involves a major disease burden and reduces the quality of life for a patient. Adequate risk evaluation, prevention and treatment of pressure ulcers can lead to a fewer incidences and prevalence of pressure ulcers.

1.3 Mindmap

1.4 Purpose

Information on the pressure ulcer is of importance in starting or continuing the best possible wound

treatment, curatively and preventatively, and to be able to properly monitor the wound healing process.

1.5 Patient Population

1.6 Evidence Base

To describe the wound, there are 4 categories, based on the international NPUAP/EPUAP decubitus classification system:

- Category 1: non-removable redness of intact skin;
- Category 2: loss of a partial layer of skin or blister;
- Category 3: loss of an entire layer of skin (visible fat);
- Category 4: loss of an entire layer of tissue (visible muscle/bone).

1.7 Information Model

«rootconcept»	PressureUlcer
Definitie	Root concept of the DecubitusWound information model. This root concept contains all data elements of the DecubitusWound information model.
Datatype	
DCM::ConceptId	NL-CM:19.1.1
DCM::DefinitionCode	SNOMED CT: 399912005 Pressure ulcer
Opties	

«data»	DecubitusCategory
Definitie	Description of the condition of the pressure ulcer, ranging from category 1 - 4.
Datatype	CO
DCM::ConceptId	NL-CM:19.1.2
DCM::DefinitionCode	LOINC: 45780-4 Pressure ulcer stage
DCM::ExampleValue	Pressure ulcer stage 3

The Health and Care Information Models (a.k.a Clinical Building Block) has been made in collaboration with several different parties in healthcare. These parties asked Nictiz to manage good maintenance and development of the information models. Hereafter, these parties and Nictiz are referred to as the collaborating parties. The collaborating parties paid utmost attention to the reliability and topicality of the data in these Health and Care Information Models. Omissions and inaccuracies may however occur. The collaborating parties are not liable for any damages resulting from omissions or inaccuracies in the information provided, nor are they liable for damages resulting from problems caused by or inherent to distributing information on the internet, such as malfunctions, interruptions, errors or delays in information or services provide by the parties to you or by you to the parties via a website or via e-mail, or any other digital means. The collaborating parties will also not accept liability for any damages resulting from the use of data, advice or ideas provided by or on behalf of the parties by means of the Health and Care Information Models. The parties will not accept any liability for the content of information in this Health and Care Information Model to which or from which a hyperlink is referred. In the event of contradictions in mentioned Health and Care Information Model documents and files, the most recent and highest version of the listed order in the revisions will indicate the priority of the documents in question. If information included in the digital version of a Health and Care Information Model is also distributed in writing, the written version will be leading in case of textual differences. This will apply if both have the same version number and date. A definitive version has priority over a draft version. A revised version has priority over previous versions.
