## 1.1 Revision History

Publicatieversie 1.0 (01-07-2015)

Publicatieversie 3.0 (01-05-2016)

Bevat: ZIB-453

Publicatieversie 3.1 (04-09-2017)

Bevat: ZIB-549, ZIB-576.

## 1.2 Concept

The treatment objective describes the desired result of the treatment/interventions in terms of the patient's diagnosed problem. The objective and target date are entered in addition to the target value. Comparing the healthcare results to the treatment objective provides insight into the effectivity of the treatment/interventions.

## 1.3 Mindmap

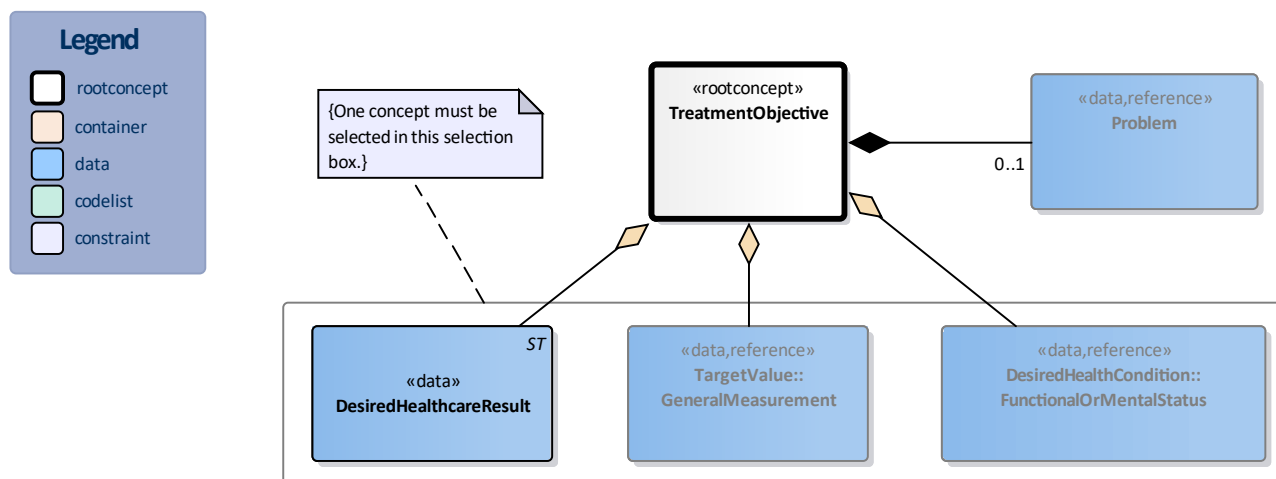

## 1.4 Purpose

A treatment objective is recorded to indicate the intention of the treatment/intervention. It provides an indication of the procedures to be carried out as part of the care process. This also enables us to monitor developments in the patient's health condition for the desired healthcare result.

## 1.5 Patient Population

## 1.6 Evidence Base

## 1.7 Information Model

«rootconcept»	TreatmentObjective	
Definitie	Root concept of the TreatmentObjective information model. This root concept contains all data elements of the TreatmentObjective information model.	
Datatype		
DCM::ConceptId	NL-CM:13.5.1	
Opties		

«data»	DesiredHealthcareResult	
Definitie	The textual account of the treatment objective. This concept provides the option to define a treatment objective which cannot be described as a measurement value or functional/mental status.	
Datatype	ST	
DCM::ConceptId	NL-CM:13.5.5	
DCM::DefinitionCode	LOINC: 27574-3 Skilled nursing treatment plan Progress note and attainment of goals (narrative)	
Opties		

«data»	TargetValue::GeneralMeasurement	
Definitie	The target value is the desired value (e.g. blood pressure, weight, pain score) which can be evaluated by means of a measurement.	
Datatype		
DCM::ConceptId	NL-CM:13.5.2	
DCM::ReferencedConceptId	NL-CM:13.3.1	This is a reference to the rootconcept of information model GeneralMeasurement.
Opties		

«data»	DesiredHealthCondition::FunctionalOrMentalStatus	
--------	--	--

<b>Definitie</b>	The desired health condition is a target value which can be expressed as the patient's functional or mental status.	
<b>Datatype</b>		
<b>DCM::ConceptId</b>	NL-CM:13.5.3	
<b>DCM::ReferencedConceptId</b>	NL-CM:4.26.1	This is a reference to the rootconcept of information model FunctionelOrMentalStatus.
<b>Opties</b>		

<b>«data»</b>	<b>Problem</b>	
<b>Definitie</b>	Description of the problem to which the treatment objective applies.	
<b>Datatype</b>		
<b>DCM::ConceptId</b>	NL-CM:13.5.4	
<b>DCM::ReferencedConceptId</b>	NL-CM:5.1.1	This is a reference to the rootconcept of information model Problem.
<b>Opties</b>		

	<b>Legend</b>	
<b>Definitie</b>		
<b>Datatype</b>		
<b>Opties</b>		

## 1.8 Example Instances

<b>Behandeldoel</b>	
<b>Probleem</b>	
ProbleemNaam	Beperkte mobiliteit
<b>GewensteGezondheidstoestand</b>	
StatusNaam	Lopen
StatusWaarde	Lichte beperking
StatusDatum	10-09-2014

## 1.9 Instructions

### 1.10 Interpretation

### 1.11 Care Process

### 1.12 Example of the Instrument

### 1.13 Constraints

## 1.14 Issues

## 1.15 References

## 1.16 Functional Model

## 1.17 Traceability to other Standards

## 1.18 Disclaimer

The Health and Care Information Models (a.k.a Clinical Building Block) has been made in collaboration with several different parties in healthcare. These parties asked Nictiz to manage good maintenance and development of the information models. Hereafter, these parties and Nictiz are referred to as the collaborating parties. The collaborating parties paid utmost attention to the reliability and topicality of the data in these Health and Care Information Models. Omissions and inaccuracies may however occur. The collaborating parties are not liable for any damages resulting from omissions or inaccuracies in the information provided, nor are they liable for damages resulting from problems caused by or inherent to distributing information on the internet, such as malfunctions, interruptions, errors or delays in information or services provide by the parties to you or by you to the parties via a website or via e-mail, or any other digital means. The collaborating parties will also not accept liability for any damages resulting from the use of data, advice or ideas provided by or on behalf of the parties by means of the Health and Care Information Models. The parties will not accept any liability for the content of information in this Health and Care Information Model to which or from which a hyperlink is referred. In the event of contradictions in mentioned Health and Care Information Model documents and files, the most recent and highest version of the listed order in the revisions will indicate the priority of the documents in question. If information included in the digital version of a Health and Care Information Model is also distributed in writing, the written version will be leading in case of textual differences. This will apply if both have the same version number and date. A definitive version has priority over a draft version. A revised version has priority over previous versions.

## 1.19 Terms of Use

The user may use the Health and Care Information Models without limitations. The copyright provisions in the paragraph concerned apply to copying, distributing and passing on the Health and Care Information Models.

## 1.20 Copyrights

A Health and Care Information Model qualifies as a work within the meaning of Section 10 of the Copyright Act (Auteurswet). Copyrights protect the Health and Care Information Models and these rights are owned by the cooperating parties.

The user may copy, distribute and pass on the information in this Health and Care Information Model under the conditions that apply for Creative Commons license Attribution-NonCommercial-ShareAlike 3.0 Netherlands (CC BY-NC-SA-3.0).

The content is available under Creative Commons Attribution-NonCommercial-ShareAlike 3.0 (see also <http://creativecommons.org/licenses/by-nc-sa/3.0/nl/>)

This does not apply to information from third parties that sometimes is used and / or referred to in a Health and Care Information Model, for example to an international medical terminology system. Any (copyright)

rights that protect this information are not owned by the cooperating parties but by those third parties.
