1.1 Revision History

Publicatieversie 1.0 (15-04-2024)

Bevat: ZIB-1146, ZIB-1295, ZIB-1370, ZIB-1394, ZIB-2170.

Publicatieversie 1.1 (24-04-2024)

Bevat: ZIB-2645, ZIB-2677, ZIB-2693.

1.2 Concept

A condition is pathological or non-pathological state of the patient that generally presents with symptoms. It is 'that what the patient has'. A care professional can assign a (differential) diagnosis to the condition. The symptoms as well as the diagnosis with respect to the same condition may change over time.

1.3 Mindmap

1.4 Purpose

A separate representation of condition and the diagnosis makes it possible to describe these separately. This makes it clear on one hand what the status of the condition is and on the other hand how the care provider names this condition. Explicit representation of data relating to the condition helps evaluate the effect of the care provided and determine the treatment plan / follow-up.

1.5 Patient Population

The entire patient population.

1.6 Evidence Base

Condition and diagnosis are two different concepts: a condition can exist without a diagnosis and the condition has characteristics that are independent of the diagnosis. Therefore, a condition on the one hand and diagnoses on the other hand are represented by separate zibs. Diagnoses are represented by three zibs: DiagnosticInsight, Hypersensitivity, and Reaction, each with a reference to the zib Condition.

The severity and course of a condition are interpretations made by a healthcare provider, but they are independent of what the patient has. They provide information about the status of the condition.

1.7 Information Model

«rootconcept»	Condition	
Definitie	This is a reference to the root concept of information model Condition. This root concept contains all data elements of the information model Condition.	
Datatype		
DCM::ConceptId	NL-CM:5.4.1	
DCM::DefinitionCode	SNOMED CT: 64572001 aandoening	
Opties		

«data»	PeriodPresent::TimeInterval	
Definitie	The period in which the condition is (was) present.	
Datatype		
DCM::ConceptId	NL-CM:5.4.8	
DCM::ReferencedConceptId	NL-CM:20.3.1	This is a reference to the rootconcept of information model TimeInterval.
Opties		

«data»	StatusDate	
Definitie	The moment from when the data regarding the condition apply. It may be a vague moment.	
Datatype	TS	
DCM::ConceptId	NL-CM:5.4.3	
DCM::DefinitionCode	SNOMED CT: 350351000146106 datum waarop gezondheidsstatus is gewijzigd	

Opties	
--------	--

«data»	Course	
Definitie	The course of the condition. This is independent of the diagnostic insight for the condition. The course indicates how the condition is developing: such as stable, progression, remission, etc..	
Datatype	CD	
DCM::ConceptId	NL-CM:5.4.5	
DCM::ValueSet	CourseCodelist	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.5.4.1
Opties		

«data»	Severity	
Definitie	Indication of the severity of the condition. A condition may cause few or mild symptoms and yet be serious, but the reverse is also possible.	
Datatype	CD	
DCM::ConceptId	NL-CM:5.4.6	
DCM::DefinitionCode	SNOMED CT: 246112005 ernst	
DCM::ValueSet	SeverityCodelist	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.5.4.3
Opties		

«data»	Comment	
Definitie	A comment in free text with respect to the condition, that is not represented by the other data elements in the information model.	
Datatype	ST	
DCM::ConceptId	NL-CM:5.4.7	
DCM::DefinitionCode	LOINC: 48767-8 Annotation comment

1.8 Example Instances

Een aandoening of gesteldheid staat nooit op zichzelf. Er zal altijd een diagnose of ≥ 1 symptoom zijn dat op de aandoening of gesteldheid betrekking heeft. Ter illustratie zijn hier daarom de namen van symptomen en een diagnose toegevoegd die naar de aandoening zouden kunnen verwijzen.

AandoeningOfGesteldheid			
PeriodeAanwezig			
StartDatumTijd	22-02-2023	22-02-2023	22-02-2023
EndDatumTijd			
StatusDatum	01-03-2023	05-03-2023	20-03-2023
Beloop		Verslechterd	Verbeterd
Ernst	Mild	Matig	Mild
Toelichting			
SymptoomNaam	Hoest	Hoest, Koorts	Hoest
DiagnoseNaam	Bronchitis	Longontsteking	Longontsteking

AandoeningOfGesteldheid

1.18 Disclaimer

The Health and Care Information Models (a.k.a Clinical Building Block) has been made in collaboration with several different parties in healthcare. These parties asked Nictiz to manage good maintenance and development of the information models. Hereafter, these parties and Nictiz are referred to as the collaborating parties. The collaborating parties paid utmost attention to the reliability and topicality of the data in these Health and Care Information Models. Omissions and inaccuracies may however occur. The collaborating parties are not liable for any damages resulting from omissions or inaccuracies in the information provided, nor are they liable for damages resulting from problems caused by or inherent to distributing information on the internet, such as malfunctions, interruptions, errors or delays in information or services provide by the parties to you or by you to the parties via a website or via e-mail, or any other digital means. The collaborating parties will also not accept liability for any damages resulting from the use of data, advice or ideas provided by or on behalf of the parties by means of the Health and Care Information Models. The parties will not accept any liability for the content of information in this Health and Care Information Model to which or from which a hyperlink is referred. In the event of contradictions in mentioned Health and Care Information Model documents and files, the most recent and highest version of the listed order in the revisions will indicate the priority of the documents in question. If information included in the digital version of a Health and Care Information Model is also distributed in writing, the written version will be leading in case of textual differences. This will apply if both have the same version number and date. A definitive version has priority over a draft version. A revised version has priority over previous versions.

1.19 Terms of Use

The user may use the Health and Care Information Models without limitations. The copyright provisions in the paragraph concerned apply to copying, distributing and passing on the Health and Care Information Models.

1.20 Copyrights

A Health and Care Information Model qualifies as a work within the meaning of Section 10 of the Copyright Act (Auteurswet). Copyrights protect the Health and Care Information Models and these rights are owned by the cooperating parties.

The user may copy, distribute and pass on the information in this Health and Care Information Model under the conditions that apply for Creative Commons license Attribution-NonCommercial-ShareAlike 3.0 Netherlands (CC BY-NC-SA-3.0).

The content is available under Creative Commons Attribution-NonCommercial-ShareAlike 3.0 (see also <http://creativecommons.org/licenses/by-nc-sa/3.0/nl/>)

This does not apply to information from third parties that sometimes is used and / or referred to in a Health and Care Information Model, for example to an international medical terminology system. Any (copyright) rights that protect this information are not owned by the cooperating parties but by those third parties.

Nictiz is the independent national competence centre for electronic exchange of health and care information. The activities of Nictiz include the targeted development and management of information standards at the request of and in partnership with the stakeholders in healthcare. Nictiz advises these parties on all aspects of information exchange and identifies (future) national and international developments.
