## 1.1 Revision History

Publicatieversie 1.0 (01-12-2021)

## 1.2 Concept

An allergy or intolerance describes a patient's tendency towards hypersensitivity to a certain substance, so that an unwanted physiological reaction is expected after exposure to the substance, while most people would not exhibit such a reaction to that amount. The observed physiological changes are usually the result of an immunological reaction.

The substances can be categorized as follows:

- Medicine
- Medicine category
- Ingredient/addition
- Nutrition
- Environmental factor
- Animal
- Plants
- Chemicals
- Inhaled allergenic

## 1.3 Mindmap

## 1.4 Purpose

Documenting and communicating allergies and intolerances is an important part of medical registration. It concerns the core of patient safety in general and medication safety in particular. In the execution of research, treatment and care, these patient characteristics constantly have to be taken into account.

In principle, allergies and intolerances are also disorders and also could be entered as a problem. Nevertheless, these are usually entered separately.

Allergies/Intolerances have a lot in common with warnings (Alert). An important difference is that with allergies and intolerances, a lot of detailed information is recorded on things such as the reactions to the causative substance. Furthermore, not every warning is a problem or medical condition. Every allergy/intolerance is, however, while not every allergy or intolerance implies a warning.

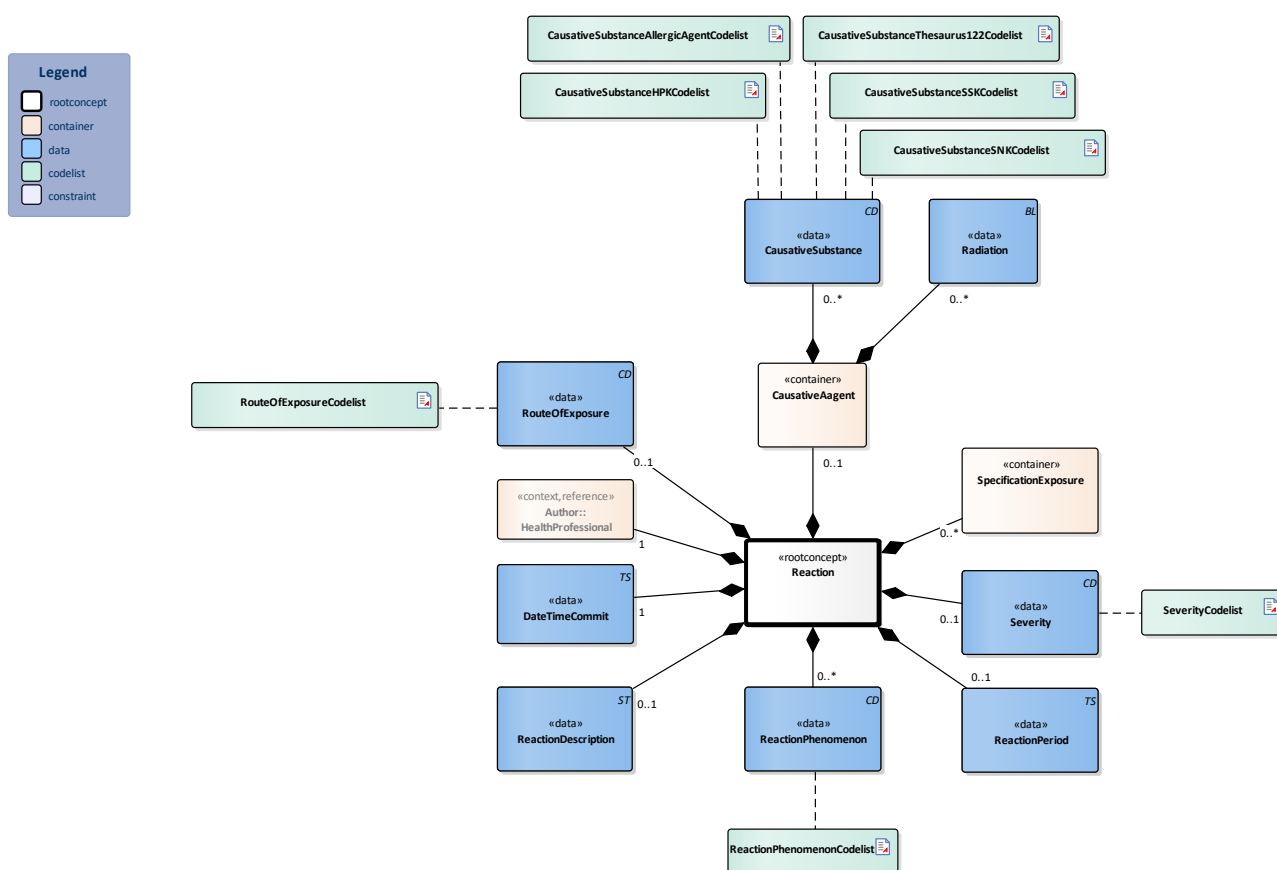

## 1.5 Patient Population

## 1.6 Evidence Base

For all allergies in the Netherlands, the codes available in the G standard are used to register and complete medicinal allergies in the work process of prescribers and pharmacists (in medication monitoring). This is outlined in the document “Allergies and unwanted substances IR V-2-3-1”.

This code is insufficient when it comes to reactions to exposure to food products, items (such as bandages and band-aids), plants and animals. For these items, the standard allows the use of free text or the use of SNOMED CT code. However, no validated value set is currently available for this purpose for SNOMED CT.

## 1.7 Information Model

«rootconcept»	Reaction
Definitie	Root concept of the Reaction information model. This root concept contains all data elements of the Reaction information model.
Datatype	
DCM::ConceptId	NL-CM:5.3.1
Opties	

«data»	ReactionPhenomenon	
Definitie	The substantive specification of the reaction (symptoms) that occurs when the patient is exposed to the substance.	
Datatype	CD	
DCM::ConceptId	NL-CM:5.3.7	
DCM::ExampleValue	Anafylaxie,Jeuk	
DCM::ValueSet	ReactionPhenomenonCodelist	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.5.3.7
Opties		

«container»	CausativeAgent	
Definitie	Container of the CausativeAgent concept.This container contains all data elements of the CausativeAgent concept.	
Datatype		
DCM::ConceptId	NL-CM:5.3.6	
Opties		

«data»	Radiation	
Definitie	Indicates whether it is (presumably) a reaction to radiation.	
Datatype	BL	
DCM::ConceptId	NL-CM:5.3.5	
Opties		

«data»	CausativeSubstance	
Definitie	The substance that (presumably) caused the reaction.	
Datatype	CD	
DCM::ConceptId	NL-CM:5.3.8	
DCM::ValueSet	CausativeSubstanceThesaurus122Codelist	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.5.3.5
DCM::ValueSet	CausativeSubstanceHPKCode list	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.5.3.2
DCM::ValueSet	CausativeSubstanceSNKCode list	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.5.3.3
DCM::ValueSet	CausativeSubstanceSSKCode list	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.5.3.4
DCM::ValueSet	CausativeSubstanceAllergicAgentCodelist	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.5.3.1
Opties		

«data»	ReactionDescription	
Definitie	Textual description of the reaction as a whole including the reaction phenomena (symptoms).	
Datatype	ST	
DCM::ConceptId	NL-CM:5.3.9	
Opties		

«data»	Severity	
Definitie	The severity of the reaction as a result of exposure to the substance.	
Datatype	CD	
DCM::ConceptId	NL-CM:5.3.10	
DCM::ExampleValue	Ernstig	
DCM::ValueSet	SeverityCodelist	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.5.3.8
Opties		

«data»	RouteOfExposure	
Definitie	Way in which the patient came into contact with the causative agent or the way in which the agent was administered.	
Datatype	CD	
DCM::ConceptId	NL-CM:5.3.11	
DCM::ValueSet	RouteOfExposureCodelist	OID: 2.16.840.1.113883.2.4.3.11.60.40.2.5.3.6
Opties		

«container»	SpecificationExposure	
Definitie	Container of the SpecificationExposure concept. This container contains all data elements of the SpecificationExposure concept.	
Datatype		
DCM::ConceptId	NL-CM:5.3.4	
Opties		

«data»	ReactionPeriod	
Definitie	Start Date: Date and time the response started. This may also only be a date or a partial date, if not known more precisely. TimeDuration: Duration of the reaction. End date: Date and time when the response stopped occurring. This may also only be a date or a partial date, if this is not known more precisely.	
Datatype	TS	
DCM::ConceptId	NL-CM:5.3.12	
Opties		

«data»	DateTimeCommit	
Definitie	The date the reaction was recorded.	
Datatype	TS	
DCM::ConceptId	NL-CM:5.3.3	
Opties		

«context»	Author::HealthProfessional	
Definitie	Person who records the reaction, this can be a healthcare professional, patient or contact person.	
Datatype		
DCM::ConceptId	NL-CM:5.3.2	
DCM::ReferencedConceptId	NL-CM:17.1.1	This is a reference to the rootconcept of information model HealthProfessional.

## 1.9 Instructions

## 1.10 Interpretation

## 1.11 Care Process

## 1.12 Example of the Instrument

## 1.13 Constraints

### 1.14 Issues

#### No known allergies

The question is whether to offer a code for "No known allergies (SNOMED CT 160244002)" and subdirectories in this information model that fall under this code, or to determine that, where applicable, the document should outline when the information model is to be applied.

#### Value set for the 'Causative substance' concept

Currently, no defined code list is yet available for allergenic substances other than medication. Entering SNOMED CT must therefore suffice to code allergenic substances for the time-being. The G standard is used to code medical products.

## 1.16 Functional Model

## 1.17 Traceability to other Standards

### 1.18 Disclaimer

The Health and Care Information Models (a.k.a Clinical Building Block) has been made in collaboration with several different parties in healthcare. These parties asked Nictiz to manage good maintenance and development of the information models. Hereafter, these parties and Nictiz are referred to as the collaborating parties. The collaborating parties paid utmost attention to the reliability and topicality of the data in these Health and Care Information Models. Omissions and inaccuracies may however occur. The collaborating parties are not liable for any damages resulting from omissions or inaccuracies in the information provided, nor are they liable for damages resulting from problems caused by or inherent to distributing information on the internet, such as malfunctions, interruptions, errors or delays in information or services provide by the parties to you or by you to the parties via a website or via e-mail, or any other digital means. The collaborating parties will also not accept liability for any damages resulting from the use of data, advice or ideas provided by or on behalf of the parties by means of the Health and Care Information Models. The parties will not accept any liability for the content of information in this Health and Care Information Model to which or from which a hyperlink is referred. In the event of contradictions in mentioned Health and Care Information Model documents and files, the most recent and highest version of the listed order in the revisions will indicate the priority of the documents in question. If information included in the digital version of a Health and Care Information Model is also distributed in writing, the written version will be leading in case of textual differences. This will apply if both have the same version number and date. A definitive version has priority over a draft version. A revised version has priority over previous versions.

### 1.19 Terms of Use

The user may use the Health and Care Information Models without limitations. The copyright provisions in the paragraph concerned apply to copying, distributing and passing on the Health and Care Information Models.

## 1.20 Copyrights

A Health and Care Information Model qualifies as a work within the meaning of Section 10 of the Copyright Act (Auteurswet). Copyrights protect the Health and Care Information Models and these rights are owned by the cooperating parties.

The user may copy, distribute and pass on the information in this Health and Care Information Model under the conditions that apply for Creative Commons license Attribution-NonCommercial-ShareAlike 3.0 Netherlands (CC BY-NC-SA-3.0).

The content is available under Creative Commons Attribution-NonCommercial-ShareAlike 3.0 (see also <http://creativecommons.org/licenses/by-nc-sa/3.0/nl/>)

This does not apply to information from third parties that sometimes is used and / or referred to in a Health and Care Information Model, for example to an international medical terminology system. Any (copyright) rights that protect this information are not owned by the cooperating parties but by those third parties.
