1.1 Revision History

Publicatieversie 1.0 (04-09-2017)

1.2 Concept

The Delirium Observation Screening Scale is a tool to determine whether a patient has delirium. The DOSS includes 13 observations of behavior (verbal and non-verbal) which represent the symptoms of a delirium. These observations can be performed during regular contact with the patient.

1.3 Mindmap

1.4 Purpose

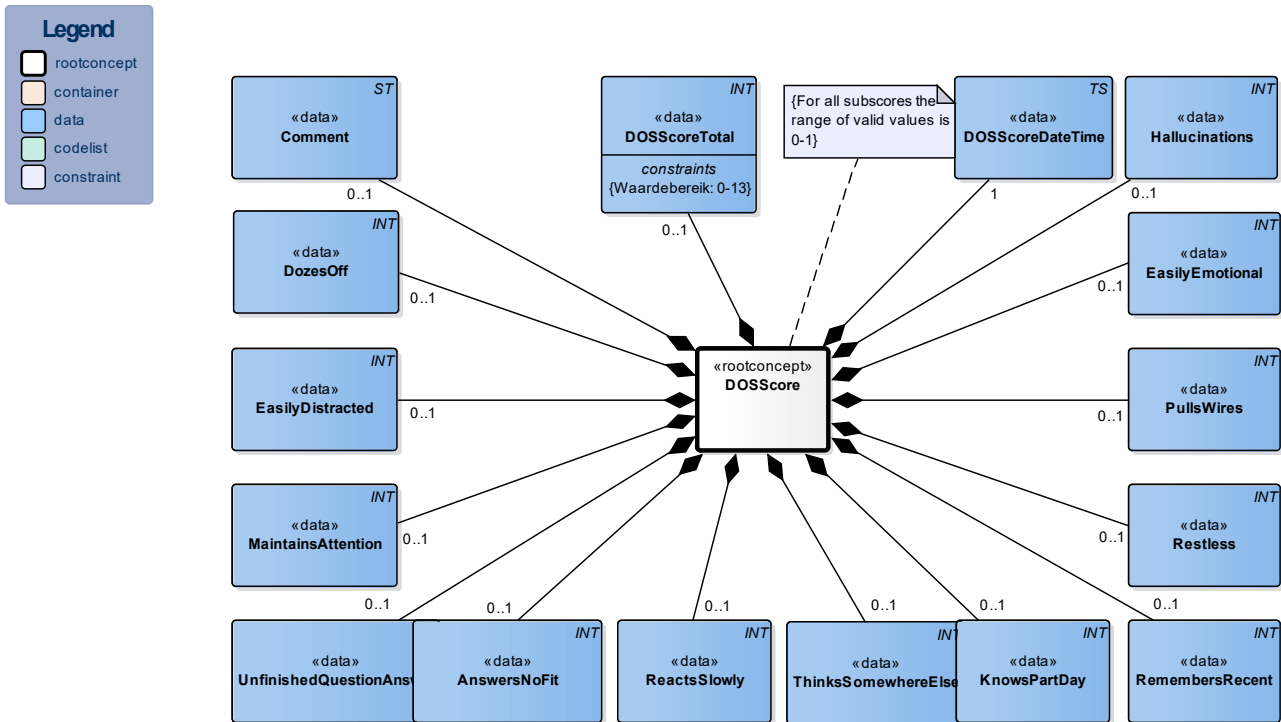

Delirium is one of the most forms of psychopathology among elderly patients and patients in the last phase of their lives. The main characteristic of delirium is the rapid onset and changing of symptoms. The DOSS is meant to qualify and quantify the nature and seriousness of delirium symptoms. This enables a quick start of treatment. The DOSS is used to signal risks and as an evaluation tool.

1.5 Patient Population

1.6 Evidence Base

The definitions of the concepts are based on the DOS score.

1.7 Information Model

«rootconcept»	DOSScore
Definitie	Root concept of the DOSScore information model. This root concept contains all data elements of the DOSScore information model.
Datatype	
DCM::ConceptId	NL-CM:18.7.1
Opties	

«data»	DOSScoreTotal
Definitie	Per shift a total score is calculated (minimum 0 and maximum 13). The total scores of three shifts (day, evening and night shifts) are summed to the total score of the day (minimum 0 and maximum 39). The DOS scale final score is calculated by dividing the total score of the day by 3 (minimum 0 and maximum 13). A DOS scale final score < 3 means that the patient is probably not delirious. A DOS scale final score > 3 means that the patient is probably delirious.
Datatype	INT
DCM::ConceptId	NL-CM:18.7.3
Opties	
Constraint	Waardebereik: 0-13

«data»	DOSScoreDateTime
--------	------------------

Definitie	The date on which the DOS score is registered.	
Datatype	TS	
DCM::ConceptId	NL-CM:18.7.5	
Opties		

«data»	DozesOff	
Definitie	<p>DOS observation: patient dozes off during conversation or activities.</p> <p>Score: 0: never 1: sometimes-always -: don't know</p>	
Datatype	INT	
DCM::ConceptId	NL-CM:18.7.6	
Opties		

«data»	EasilyDistracted	
Definitie	<p>DOS observation: patient is easily distracted by stimuli from the environment.</p> <p>Someone is easily distracted by stimuli from the environment when he/she responds verbally or non-verbally to sounds or movements that have no relation to him/her and the nature of which does not make you expect a reaction from him/her.</p> <p>Score: 0: never 1: sometimes-always -: don't know</p>	
Datatype	INT	
DCM::ConceptId	NL-CM:18.7.7	
Opties		

«data»	MaintainsAttention	
Definitie	<p>DOS observation: patient maintains attention to conversation or action.</p> <p>Someone is maintaining attention to a conversation or action if he/she verbally or non-verbally shows that they are following the conversation or action.</p> <p>Score: 1: never 0: sometimes-always -: don't know</p>	
Datatype	INT	
DCM::ConceptId	NL-CM:18.7.8	
Opties		

«data»	UnfinishedQuestionAnswer	
Definitie	DOS observation: patient does not finish question or answer.	

	Score: 0: never 1: sometimes-always -: don't know
Datatype	INT
DCM::ConceptId	NL-CM:18.7.9
Opties	

«data»	AnswersNoFit
Definitie	DOS observation: patient gives answers that do not fit the question. Score: 0: never 1: sometimes-always -: don't know
Datatype	INT
DCM::ConceptId	NL-CM:18.7.10
Opties	

«data»	ReactsSlowly
Definitie	DOS observation: patient reacts slowly to instructions. Someone reacts slowly to instructions when acting is delayed and/or there are moments of stillness/inactivity before moving into action. Score: 0: never 1: sometimes-always -: don't know
Datatype	INT
DCM::ConceptId	NL-CM:18.7.11
Opties	

«data»	ThinksSomewhereElse
Definitie	DOS observation: patient thinks they are somewhere else. Someone thinks they are somewhere else when he/she shows this in words or actions. Score: 0: never 1: sometimes-always -: don't know
Datatype	INT
DCM::ConceptId	NL-CM:18.7.12
Opties	

«data»	KnowsPartDay
Definitie	DOS observation: patient knows which part of the day it is. Someone knows what part of the day it is when he/she shows such in

	words or actions. Score: 1: never 0: sometimes-always -: don't know
Datatype	INT
DCM::ConceptId	NL-CM:18.7.13
Opties	

«data»	RemembersRecent
Definitie	DOS observation: patient remembers recent events. Someone remembers recent events when he/she can for example tell whether they had visitors or what he/she ate. Score: 1: never 0: sometimes-always -: don't know
Datatype	INT
DCM::ConceptId	NL-CM:18.7.14
Opties	

«data»	Restless
Definitie	DOS observation: patient is picking, disorderly, restless. Score: 0: never 1: sometimes-always -: don't know
Datatype	INT
DCM::ConceptId	NL-CM:18.7.15
Opties	

«data»	PullsWires
Definitie	DOS observation: patient pulls IV tubing, feeding tubes, catheters, etc. Score: 0: never 1: sometimes-always -: don't know
Datatype	INT
DCM::ConceptId	NL-CM:18.7.16
Opties	

«data»	EasilyEmotional
Definitie	DOS observation: patient is easily or suddenly emotional. Someone is easily or suddenly emotional when he/she responds with a fierce emotion without provocation or when the fierceness of the emotion

	does not seem to match the provocation.	
	Score: 0: never 1: sometimes-always -: don't know	
Datatype	INT	
DCM::ConceptId	NL-CM:18.7.17	
Opties		

«data»	Hallucinations	
Definitie	DOS observation: patient sees/hears things which are not there. Someone sees/hears things which are not there when he/she shows this verbally (ask!) or non-verbally. Score: 0: never 1: sometimes-always -: don't know	
Datatype	INT	
DCM::ConceptId	NL-CM:18.7.18	
Opties		

«data»	Comment	
Definitie	Comment on the DOS score.	
Datatype	ST	
DCM::ConceptId	NL-CM:18.7.2

1.18 Disclaimer

The Health and Care Information Models (a.k.a Clinical Building Block) has been made in collaboration with several different parties in healthcare. These parties asked Nictiz to manage good maintenance and development of the information models. Hereafter, these parties and Nictiz are referred to as the collaborating parties. The collaborating parties paid utmost attention to the reliability and topicality of the data in these Health and Care Information Models. Omissions and inaccuracies may however occur. The collaborating parties are not liable for any damages resulting from omissions or inaccuracies in the information provided, nor are they liable for damages resulting from problems caused by or inherent to distributing information on the internet, such as malfunctions, interruptions, errors or delays in information or services provide by the parties to you or by you to the parties via a website or via e-mail, or any other digital means. The collaborating parties will also not accept liability for any damages resulting from the use of data, advice or ideas provided by or on behalf of the parties by means of the Health and Care Information Models. The parties will not accept any liability for the content of information in this Health and Care Information Model to which or from which a hyperlink is referred. In the event of contradictions in mentioned Health and Care Information Model documents and files, the most recent and highest version of the listed order in the revisions will indicate the priority of the documents in question. If information included in the digital version of a Health and Care Information Model is also distributed in writing, the written version will be leading in case of textual differences. This will apply if both have the same version number and date. A definitive version has priority over a draft version. A revised version has priority over previous versions.

1.19 Terms of Use

The user may use the Health and Care Information Models without limitations. The copyright provisions in the paragraph concerned apply to copying, distributing and passing on the Health and Care Information Models.

1.20 Copyrights

A Health and Care Information Model qualifies as a work within the meaning of Section 10 of the Copyright Act (Auteurswet). Copyrights protect the Health and Care Information Models and these rights are owned by the cooperating parties.

The user may copy, distribute and pass on the information in this Health and Care Information Model under the conditions that apply for Creative Commons license Attribution-NonCommercial-ShareAlike 3.0 Netherlands (CC BY-NC-SA-3.0).

The content is available under Creative Commons Attribution-NonCommercial-ShareAlike 3.0 (see also <http://creativecommons.org/licenses/by-nc-sa/3.0/nl/>)

This does not apply to information from third parties that sometimes is used and / or referred to in a Health and Care Information Model, for example to an international medical terminology system. Any (copyright) rights that protect this information are not owned by the cooperating parties but by those third parties.
